Rockville, Maryland 20852

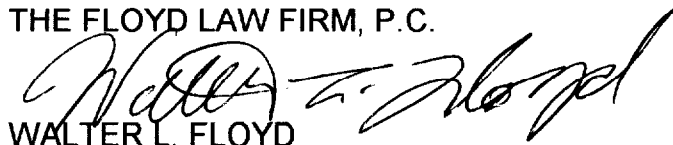

Dear Ms. Henney:

I would like to know which foods are genetically engineered and I want GE foods tested and labeled and a moratorium imposed on all new GE foods until they are proven safe. There is no current requirement for long-term studies exploring their impact on human health or the environment. I am also asking for mandatory pre-market safety testing on all GE foods. I am concerned that emerging studies show GE foods could create new toxins, antibiotic resistance, allergic reactions and other dietary risks for consumers, and therefore, should not be "generally recognized as safe [GRAS]." I feel that GE foods are shown to be a significant threat to the environment. Particularly, GE agriculture puts organic foods at risk because organic crops are being contaminated by "genetic drift." For all of the foregoing reasons, I ask that legislation be passed to require all of the above.

Respectively submitted,

THE FLOYD LAW FIRM, P.C.

WALTER L. FLOYD
